Introduction to Ruby on Rails

The Future

Credit: <https://www.youtube.com/watch?v=nKlu9yen5nc>

Web App?

Internet?

Analogy: <https://speakerdeck.com/therod/programming-101>

A Restaurant!

Analogy: <https://speakerdeck.com/therod/programming-101>

In a Restaurant

You tell the **WAITER** what you would like to eat (a **DISH**) by pointing on the **MENU**.

The **WAITER** delivers your request to the **CHEF**.

The **CHEF** prepares your **DISH**, and sends it back through the **WAITER** again.

Online

You tell the **INTERNET** what you would like to see (a **PAGE**) by pointing in the **BROWSER**.

The **INTERNET** delivers your request to the **SERVER**.

The **SERVER** prepares your **PAGE**, and sends it back through the **INTERNET** again.

Internet?

Analogy: <https://speakerdeck.com/therod/programming-101>

Web Apps act like... **Chefs**

- Take requests
- Do something with the requests
- Send the results back

Analogy: <https://speakerdeck.com/therod/programming-101>

What's a Web App again?

Web Apps are programs that lives on the server
that responds to your requests.

They can listen to specific instructions.

Just like a Chef!

For example, you can go to the hawker centre and order

Kopi O Siew Dai or Char Kway Teow Mai Hum

You can also tell i.e. Facebook, to decline your Mom's Friend Request!

Create a Web App

Ruby on Rails

<http://rubyonrails.org>

David Heinemeier Hansson (DHH)

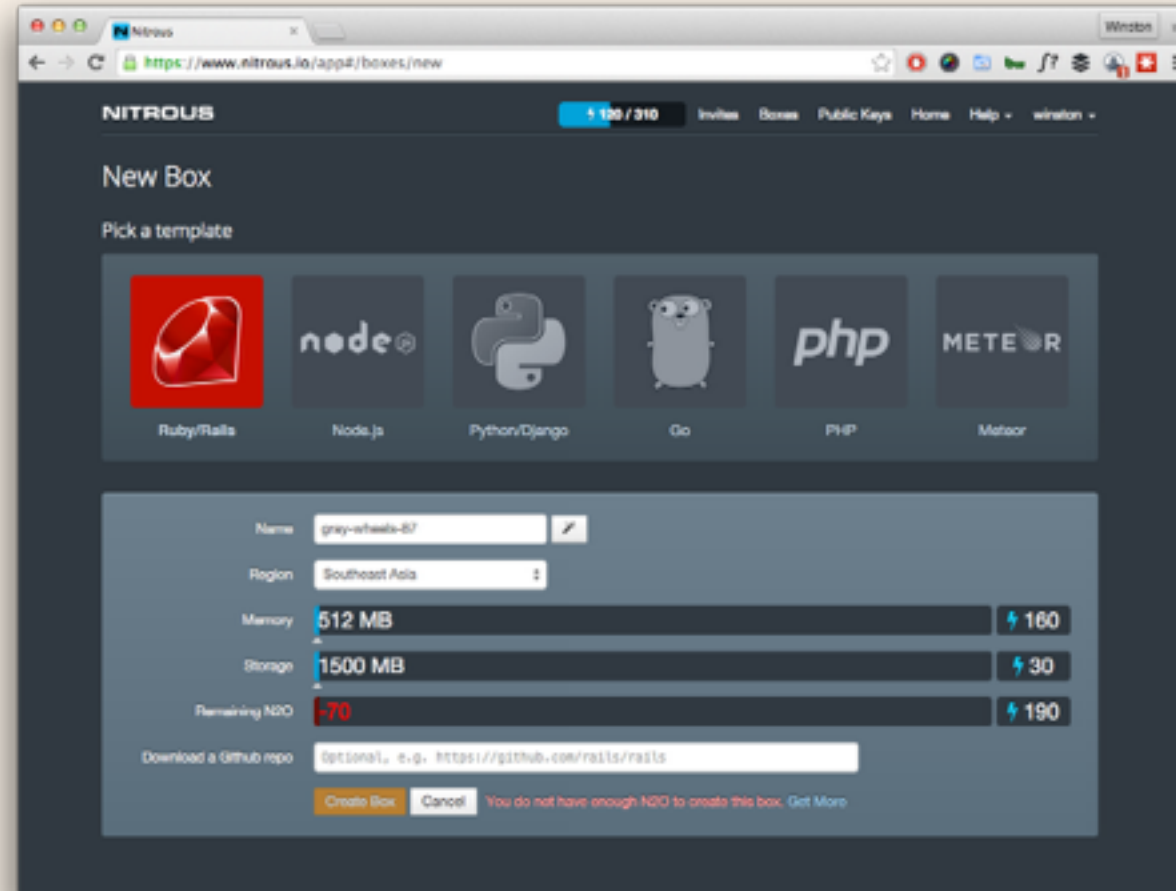

- ~ Partner of Basecamp (formerly 37Signals)
- ~ also a race car driver

Photo: <http://etalks.me/wp-content/uploads/2014/03/David-Heinemeier-Hansson.jpg>

Ruby on Rails Powered

- Twitter
- Groupon
- Airbnb
- Shopify
- Hulu
- Viki
- Bloomberg
- Slideshare
- Basecamp
- Zendesk
- Friendster
- Wego

<http://www.nitrous.io>

Console Commands

irb

```
>> pwd
```

```
>> ls -la
```

```
>> ruby -v
```

```
>> rails -v
```

Create a Rails app

irb

```
>> cd workspace
```

```
>> rails new hobbies
```

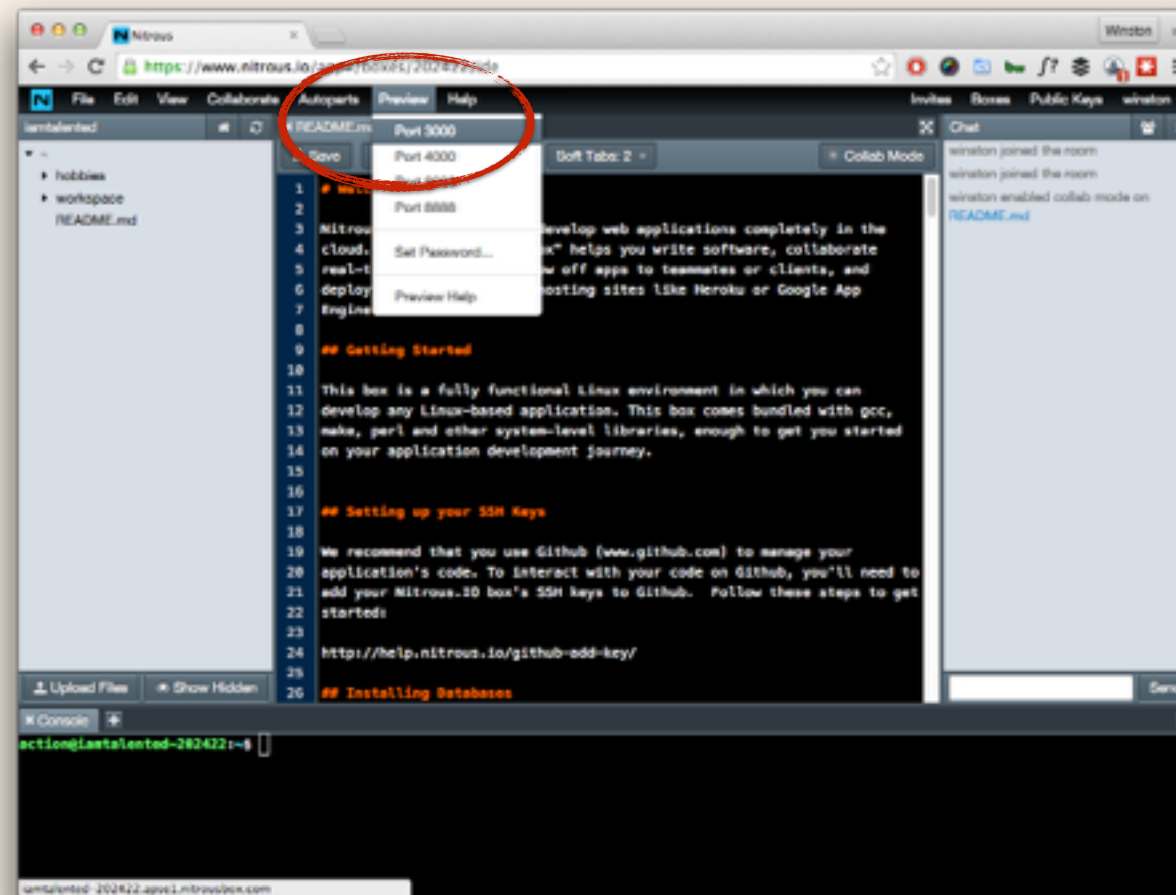

```
>> cd hobbies
```

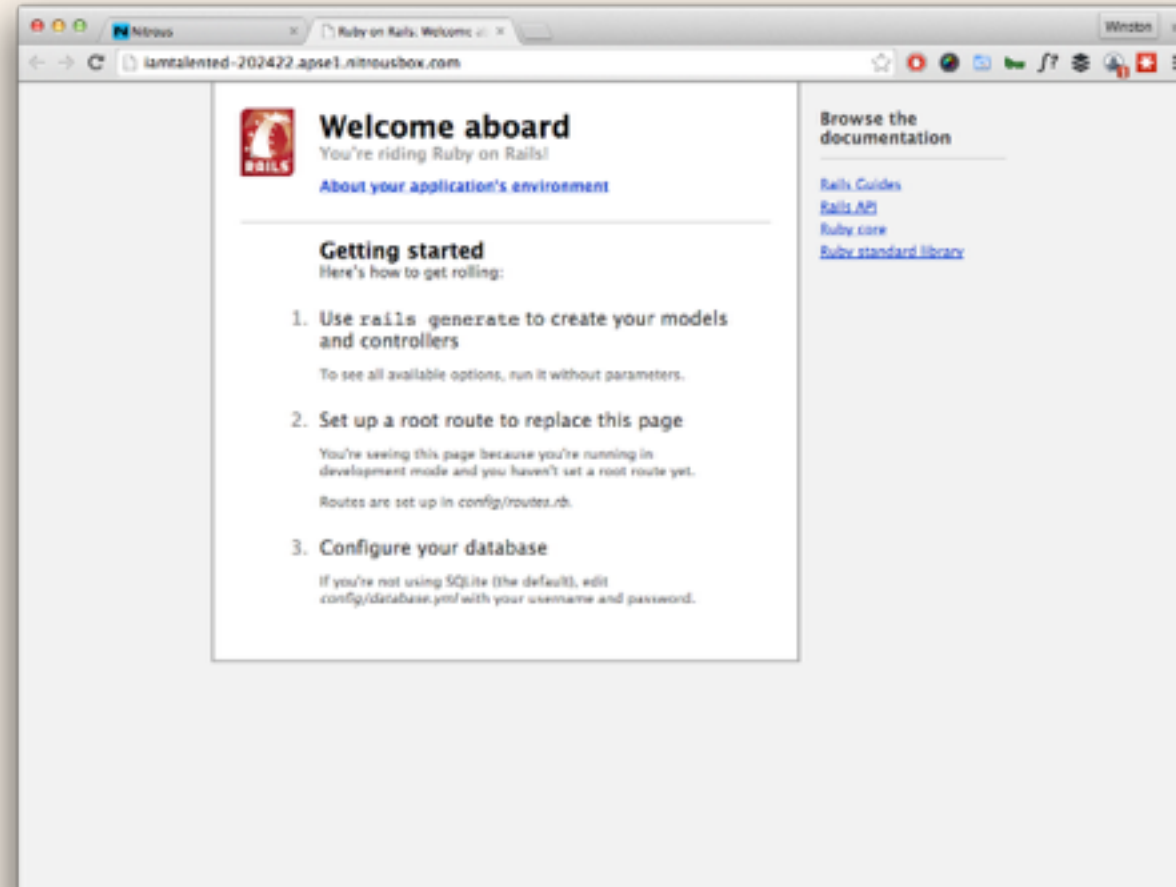

```
>> ls -la
```

Start a Rails app

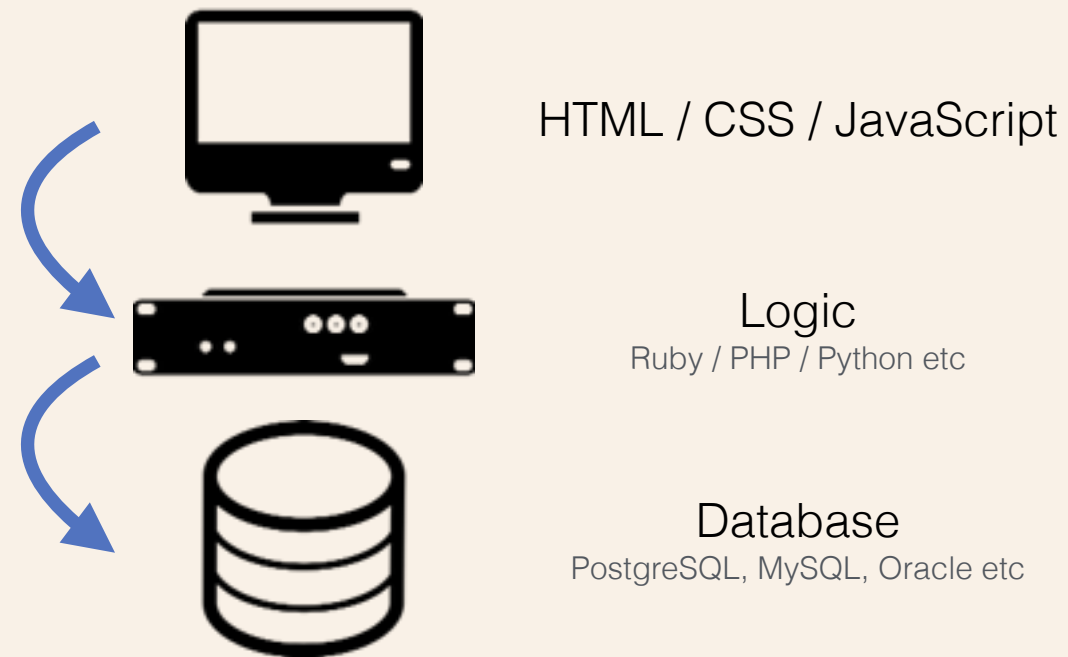

irb

```
>> rails server  
==> Booting WEBrick  
...  
...  
...  
>> <ctrl+c>
```

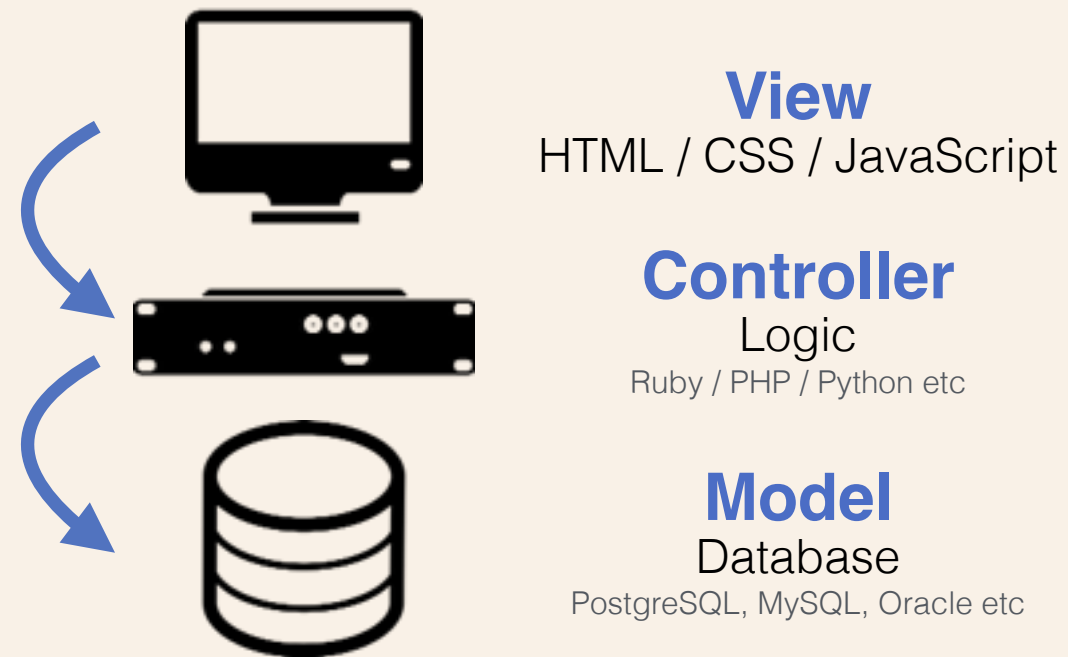

Model-View-Controller

Icons: <http://www.thenounproject.com/anton.outkine>

Model-View-Controller

Icons: <http://www.thenounproject.com/anton.outkine>

```
> rails generate controller welcome index
```

```
# app/views/hobbies/index.html.erb
```

- h1
- hobbies + hours spent
- total hours spent
- time right now + format time

The Book

<http://pragprog.com/book/rails4/agile-web-development-with-rails-4>

**I think everyone should learn how to program a computer,
because it teaches you how to think.**

**I view computer science as a liberal art, something
everyone should learn to do.**

– Steve Jobs

Congratulations!
